📄 SUMMARY

Passionate **Full-Stack Developer** specializing in **React.js** and **Node.js**, with a solid foundation in computer science and hands-on experience building scalable, responsive, and user-focused web applications. Holds an **MCA (2025)** from *Shri Ramswaroop Memorial University, Barabanki*, and a **B.Sc in Computer Applications (2023)** from *Brahmanand PG College, Kanpur*. Focused on clean code, best practices, and innovative solutions to deliver high-quality, maintainable, and performance-driven software aligned with modern industry standards.

🎓 EDUCATION

Master's of Computer Applications,
Shri Ramswaroop Memorial University
04/2023 – 04/2025 | Barabanki

Bachelor of Science (Computer Applications),
Bramhanand PG College
09/2022 – 06/2023 | Kanpur

🧠 SKILLS

Full Stack Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Frontend: React.js, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, REST APIs

Database: MongoDB (Mongoose)

Languages: Java (Core), C, Python (Basics)

Tools: Git, GitHub, Postman, VS Code, Netlify

🏆 KEY ACHIEVEMENTS

Scan My Meal Project

Successfully developed 'Scan My Meal', a real-time food ordering web app as a final project for my MCA degree with extensive UI and backend functionalities.

📜 CERTIFICATIONS

IBM's web development fundamentals

Python training by coding blocks Lucknow

📁 PROJECT EXPERIENCE

Scan My Meal 🔗

Scan My Meal is a dynamic, full-stack food ordering web application that enables users to browse, search, and order food items in real-time. The platform includes an intuitive admin dashboard for managing categories, subcategories, products, users, and orders efficiently.

- **Tech Stack:** MERN (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, Stripe, Cloudinary, JWT, Framer Motion, Netlify, Render
- Developed a responsive, real-time food ordering platform with user and admin roles.
- Implemented secure **JWT authentication** with refresh tokens and role-based access control.
- Integrated **Stripe** for payments, **Cloudinary** for image uploads, and **Nodemailer** for email notifications.
- Built an **admin dashboard** to manage categories, subcategories, products, users, and orders.
- Enabled **cart operations**, **search/filter**, and **profile management** with avatar uploads.
- Added **password reset** via email, **toast notifications**, and smooth UI with **Framer Motion**.
- Deployed frontend on **Netlify** and backend on **Render** for deployment.

Blo-docs 🔗

Blo-Docs is a sleek and modern **blog web application** built with React, powered by **Appwrite** as the backend-as-a-service (BaaS). It allows users to sign up, write rich blog posts, manage their content, and explore posts written by others — even without logging in.

- **Tech Stack:** ReactJs, Appwrite (BaaS), Redux Toolkit, React Hook Form, TinyMCE, Tailwind CSS, SweetAlert2.
- Built a sleek blog platform with **authentication** (login/signup/logout) and **public post access** without login.
- Enabled **post CRUD functionality** with rich text editing using **TinyMCE** and **Appwrite Buckets** for image uploads.
- Integrated **Redux Toolkit** for state management and **React Hook Form** for robust form handling and validation.
- Used **auto-generated slugs** for SEO-friendly URLs and **html-react-parser** for secure HTML rendering.
- Delivered a clean UI with **Tailwind CSS** and smooth UX using **SweetAlert2** for alerts and confirmations.

🔗 EXTRA CURRICULAR ACTIVITIES

NCC 'B' certifications, NCC 'A' certifications
